

FIRST CDCF EVENT

10/29/2022

About Dashain Cup

Dashain cup is the annual soccer tournament hosted by Seattle FC. Different Nepali teams, some Seattle based and some from out of state participated in this tournament. The players practiced yearlong for this tournament because the winning price is grand, and the game is also very competitive.

NEYPVAL TEAM AT DASHAIN CUP 2022

The players from different soccer club attended the tournament to compete. We had a lot of local Nepalis people from the community to attend and cheer for the teams and players they support. This tournament was a perfect niche for our CDCF (Center of disease control and prevention foundation) year-2 team to collect data and understand the health needs for Nepali people. Our CDCF year 2/NEYPVAL team came early in the morning to the field and settled the booth.

NEYPVAL team members: Shraddha KC, Palina Piya, Shubhechha Shakya, Subekshya Regmi and volunteer Danny Baral

We provided cookies, Gatorade, water, hand sanitizers, flyers as well as information regarding covid, flu and monkeypox. Not only the players attended the tournament, but we also had local people to cheer for their team and players. Being the first event for the CDCF year 2 team, this event was a great success.

COMMUNITY ENGAGEMENT ACTIVITIES

Like mentioned above, the motive of this collaboration was to collect survey and understand the health need of our community, to make this process smoother and fun, the team had prepared community engagement activities like polls, photo center and flying kites. The team also wrote important messages regarding flu and covid.

Since everything is electronic in today's world, adding something non-technical in the event added greater engagement and curiosity in people.

We would also like to thank you Prabin Dahal(treasurer), Sophia Kunwar(Youth Committee and Inventory), Anish Thapa(Sports Committee Events) and Shraddha Malla(General Secretary) for assisting us throughout the event.

In Dashain, we fly kites to send message to Lord Indra, the god of rain, to stop the rain as the rice fields do not need more water. Similarly, the NEYPVAL team also used the kites to send messages to our community to be safe from covid and flu by getting vaccinated

Altogether, the event was a big achievement for the NEYPVAL team. Each member had worked very diligently to get this result. Shraddha KC helped with the flyer, Dolma Sherpa helped with the display board, Palina Piya helped with logistics, Subekshya Regmi helped with all event monitoring as well as photography and Shubhechha Shakya helped with community engagement. A big thank you to Danny Baral for volunteering in this event.

Survey Results

The approach we had on achieving our data was by creating surveys and posting it on social media along with the tournament. We were able to collect 53 survey responses from local nepali people residing here in WA state. If you would like to take part in this survey, please follow the link:
